If you have lost your key code, you can download it again here. If you have forgotten your password, click here. Already have an account? Check your inbox for the activation code. You can cancel your FREE trial at any time. Good news! Enter your registration code here: Sorry, your requested language is not supported in this trial version. Try a Free Demo! Your account You've registered successfully. Please check your email inbox for the account activation code.Q: Exception while retrieving data from model in Grails - Error Instance [of] BaseDomain is not an instance of groovy.lang.Binding I have a domain class named Student, and i'm trying to retrieve data from it like this: studentInstance = Student.get(id) where id = 123 studentInstance.getFirstName() The code is returning this error: Error Instance [of] BaseDomain is not an instance of groovy.lang.Binding I tried creating a bind variable like this: studentInstance = Student.get(id, bindVariable:'studentInstance') But it returns same error as before. Can someone help me? A: What about just: ? That is because you have a typo in the name of your bind variable. It should be studentInstance and not studentInstance.
